Why a winter menu

Our suppliers' harvest changes with the season, and the winter menu lets the kitchen use root vegetables, squash and stored apples while they are at their best. Some summer ingredients, such as fresh tomatoes and soft herbs, become expensive or must be shipped from far away in winter, so dishes that depend on them are reduced or adjusted.

The winter salmon costs more than the regular salmon because winter supply is smaller and the dish includes additional sides. The regular price of $21 returns on March 1.

The Allergen Guide covers the regular menu. For allergen information on winter dishes, please ask your server, who can check the recipe card with the kitchen.
