The Garden Table — Allergen Guide

Common Allergens

The kitchen regularly handles milk, eggs, wheat, fish, shellfish, soy, and nuts. Because ingredients are prepared in a shared kitchen, the restaurant cannot guarantee that a dish is completely free from a specific allergen.

Dairy

The mushroom pasta contains dairy in its standard preparation. Some dishes can be prepared without dairy when requested, but guests should confirm with their server.

Gluten

Pasta and sourdough contain wheat. Guests avoiding gluten should ask about alternatives. The restaurant does not operate a dedicated gluten-free kitchen.

Seafood

Grilled salmon contains fish. Crispy calamari contains shellfish. Guests with seafood allergies should notify staff before ordering.
